

Bay Delta Conservation Plan Review Document Comment Form

Document: **DRAFT TABLE OF POTENTIAL BDCP NEAR-TERM ACTIONS AND CRITERIA FOR EVALUATION; HANDOUT #2 TO INTEGRATION TEAM, FEBRUARY 24, 2009**

Name: Phil Harrington

Affiliation: City of Antioch

Date: February 27, 2009

Please use this form to document your comments to the above document. Please number your comments in the first column and indicate the page, section, and line number (if provided) that reference the comment's location in the review document in the next three columns. **Return completed comment forms to Rick Wilder (wilderrm@saic.com) and Pete Rawlings (rawlingsms@saic.com).**

To be of the greatest value to the document development process, please make your comments as specific as possible (e.g., rather than stating that more current information is available regarding a topic, provide the additional information [or indicate where it may be acquired]; rather than indicating that you disagree with a statement, indicate why you disagree with the statement and recommend alternative text for the statement). Do not enter information in the **Disposition** column. This column will be used by SAIC to record how each comment was addressed during the document revision process.

No.	Page #	Section #	Line #	Comment	Disposition
1	2	--	2	The document evaluates the consistency of four potential near-term actions with BDCP goals and objectives, and concludes for each "Consistent with BDCP co-equal goals of water supply and fish protection." The City of Antioch requests that additional detail be provided regarding the definition of the "water supply" goal. The potential impacts of these projects (and the larger BDCP project) on water quality and water supply at the City of Antioch's intake in the western Delta should be evaluated. The evaluation should include data or information on the salinity and water quality of water at the City's existing intake location, including a detailed time series of salinity under the existing condition and with the proposed project(s). The City is concerned that impacts to its water supply are not being evaluated and may not be part of the co-equal BDCP "water supply" goal.	
2	All	--	--	The City of Antioch is concerned about the "piece-mealing" of projects. For example, we understand that the CEQA evaluation for the Franks Tract (3-mile Slough) project may not consider BDCP actions (e.g., North Delta diversion, habitat restoration/creation) to be "reasonably foreseeable" or part of the future cumulative scenario. We request that the BDCP program commit to evaluating these near-term projects as part of the future cumulative scenario for the BDCP process.
